

Creating/Opening Projects in Visual Studio

Below are instructions for creating a project and saving it on your laptop. In the instructions below we saved the project in your laptop's Desktop folder. However, you can choose any folder you wish as long as it resides on your laptop. Additionally, there are instructions for opening the project off your laptop.

It is recommended you save your project locally on your laptop. Saving a project in a network location could result in data loss. ***If you do not change the project location when creating/saving your project, to your laptop, your data will not be recoverable.***

How to Create a Project in Visual Studio

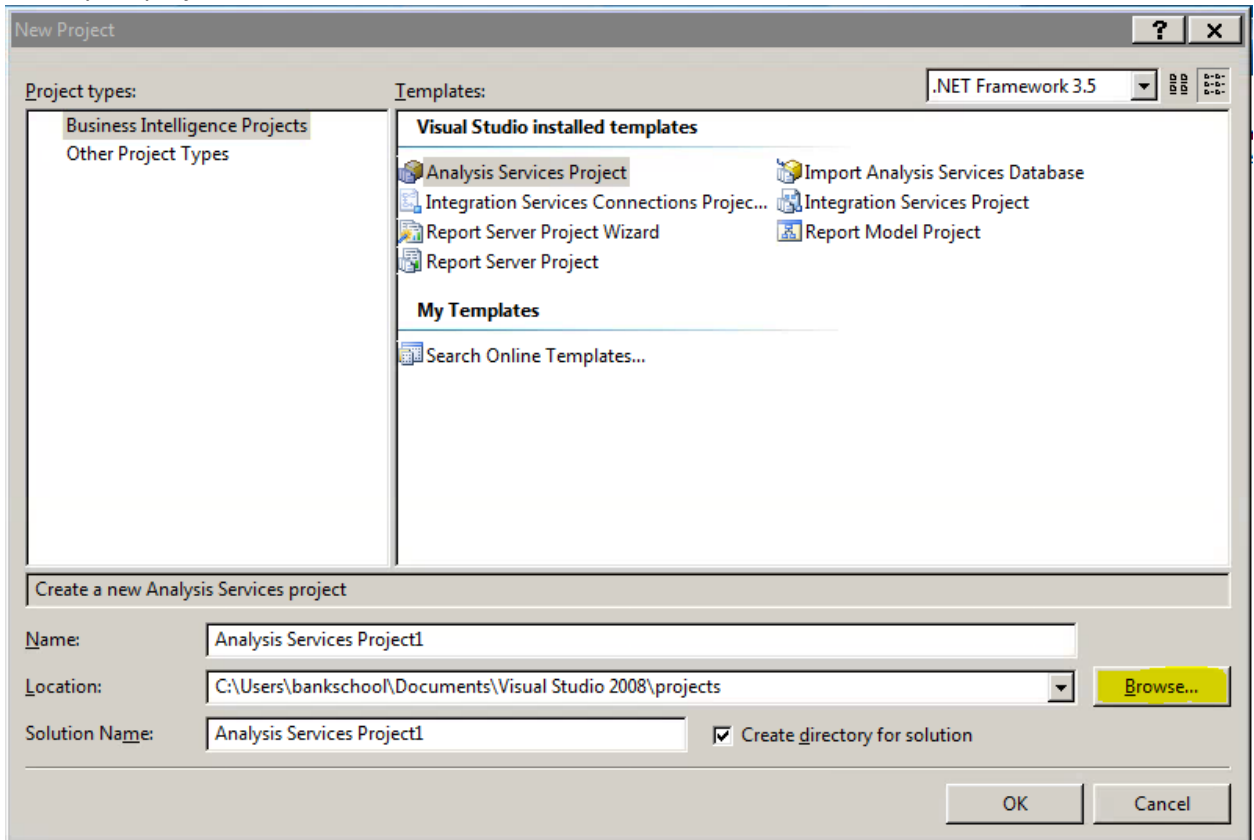

1. In Citrix Receiver open **SQL Server Business Intelligence Developer**.

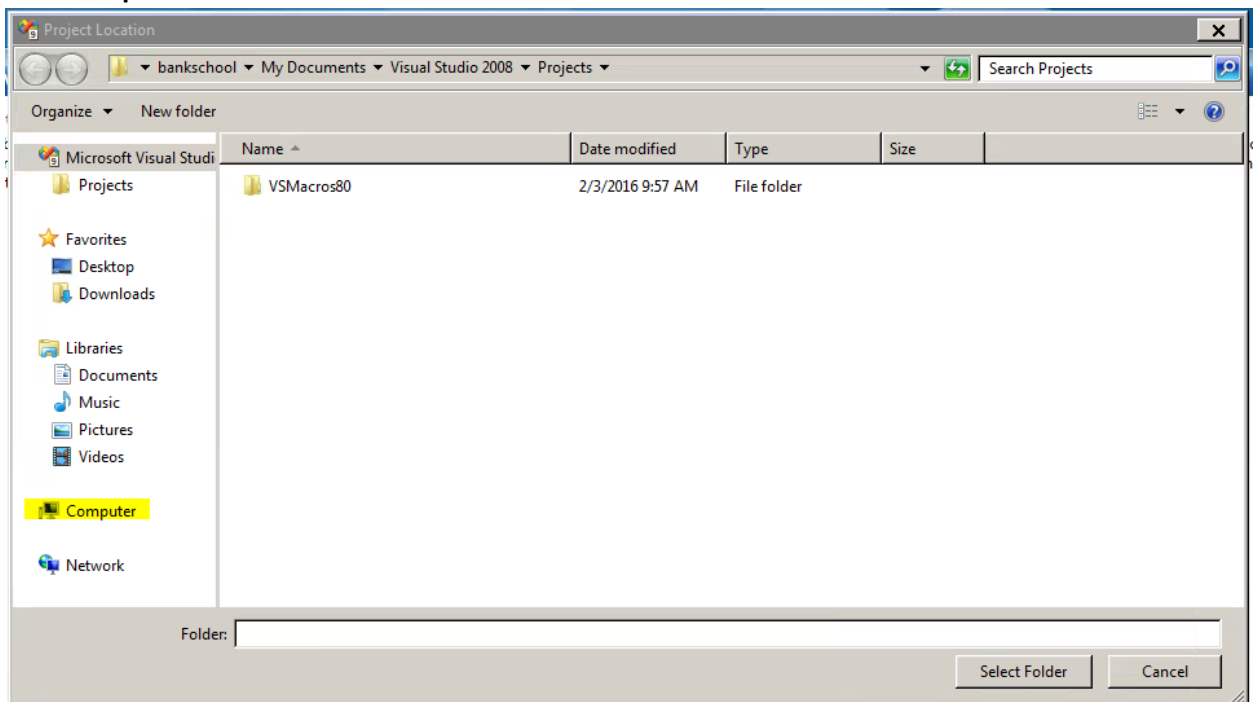

2. Click **Project** next to "Create:".

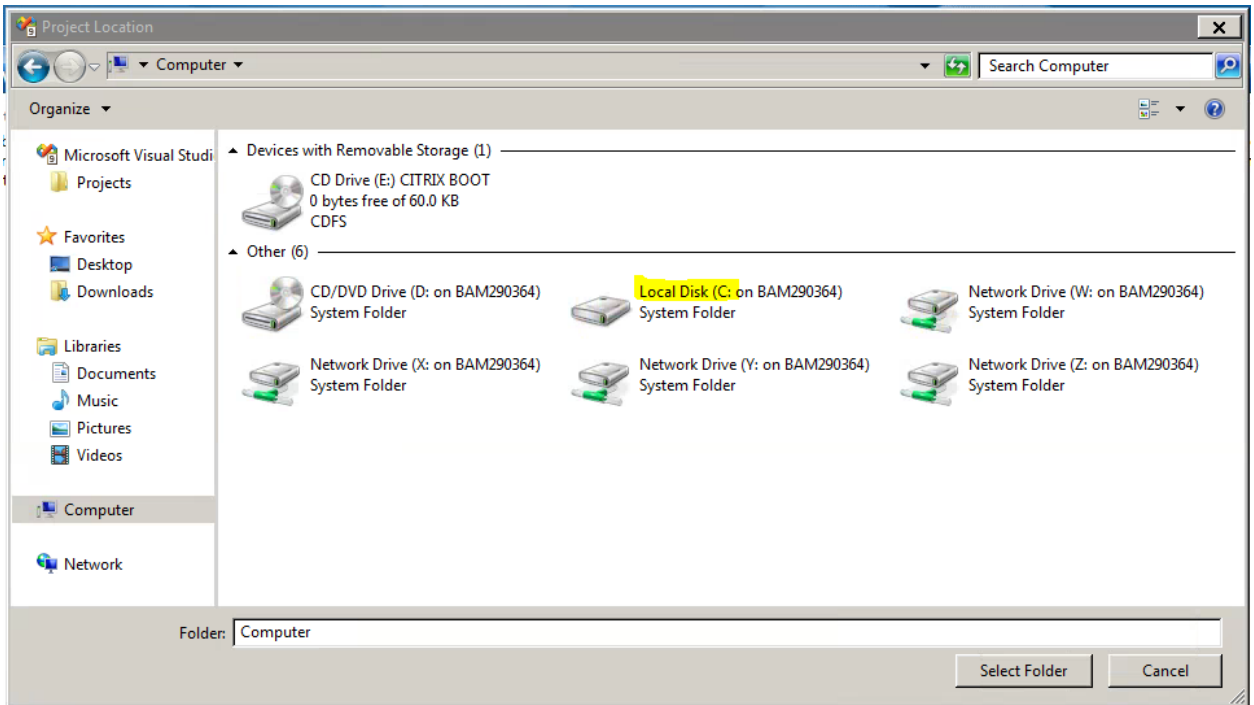

3. Name your project, then click **Browse**.

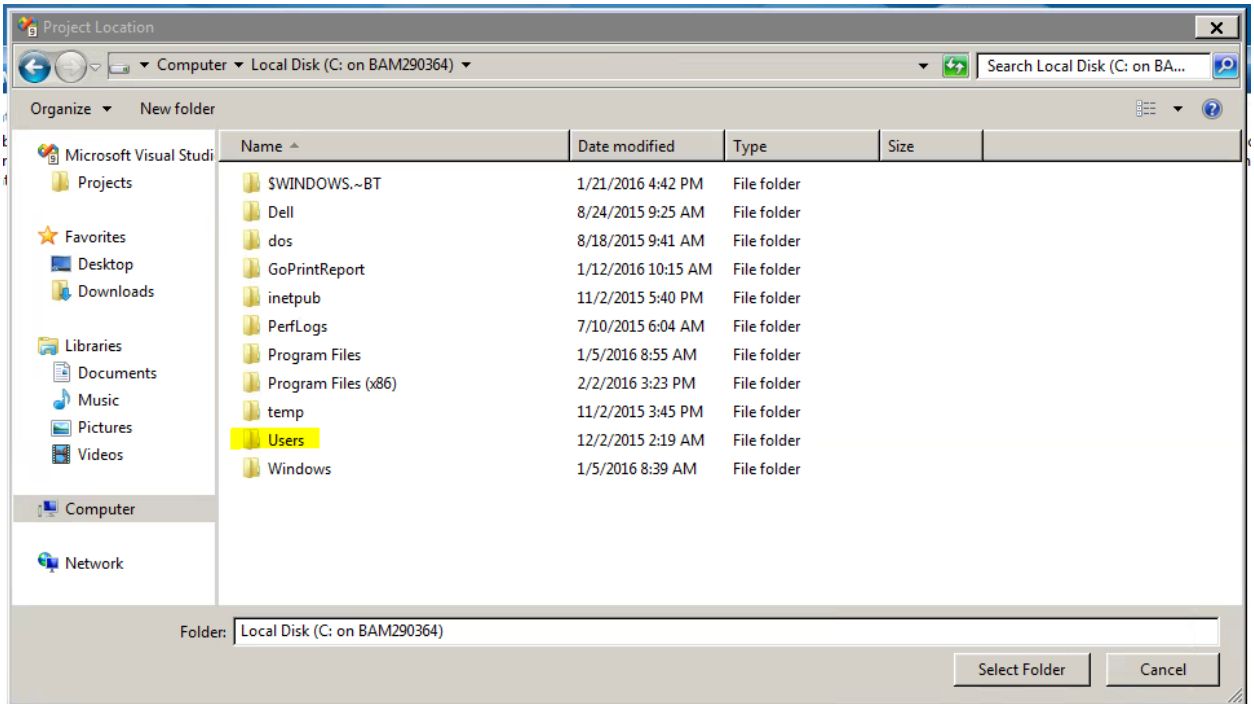

4. Click **Computer** on the left menu.

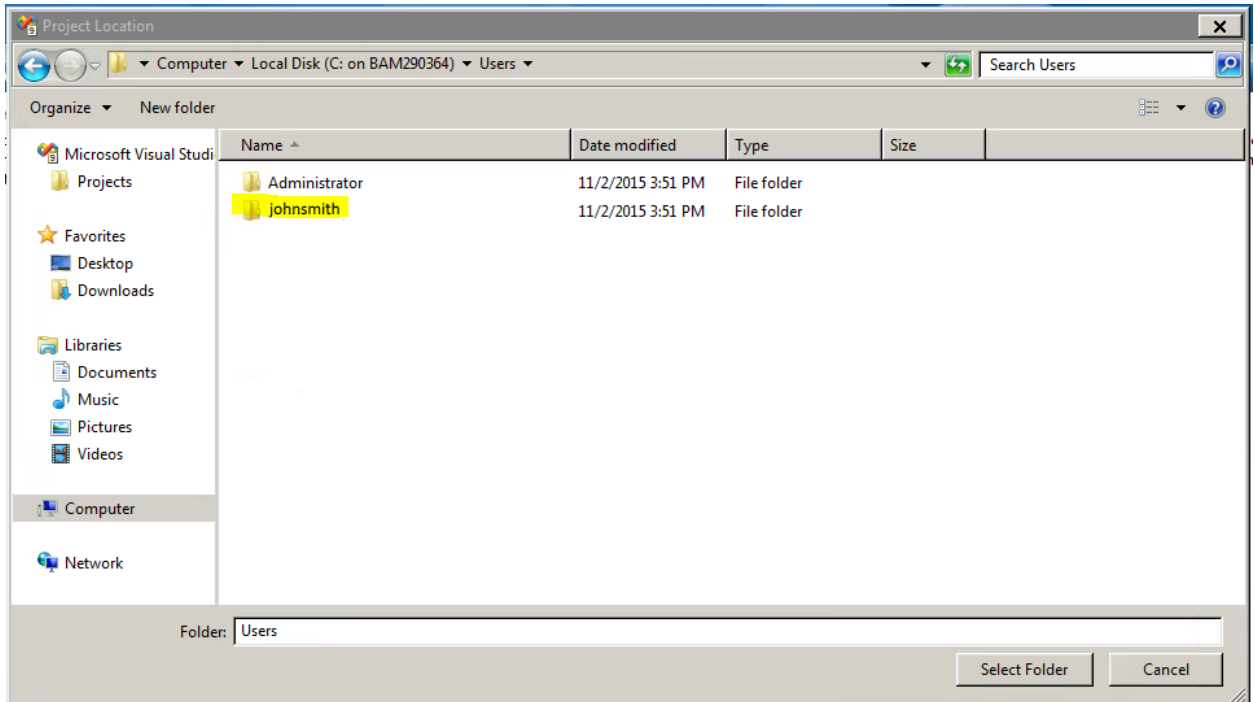

5. Double-click **Local Disk C:**

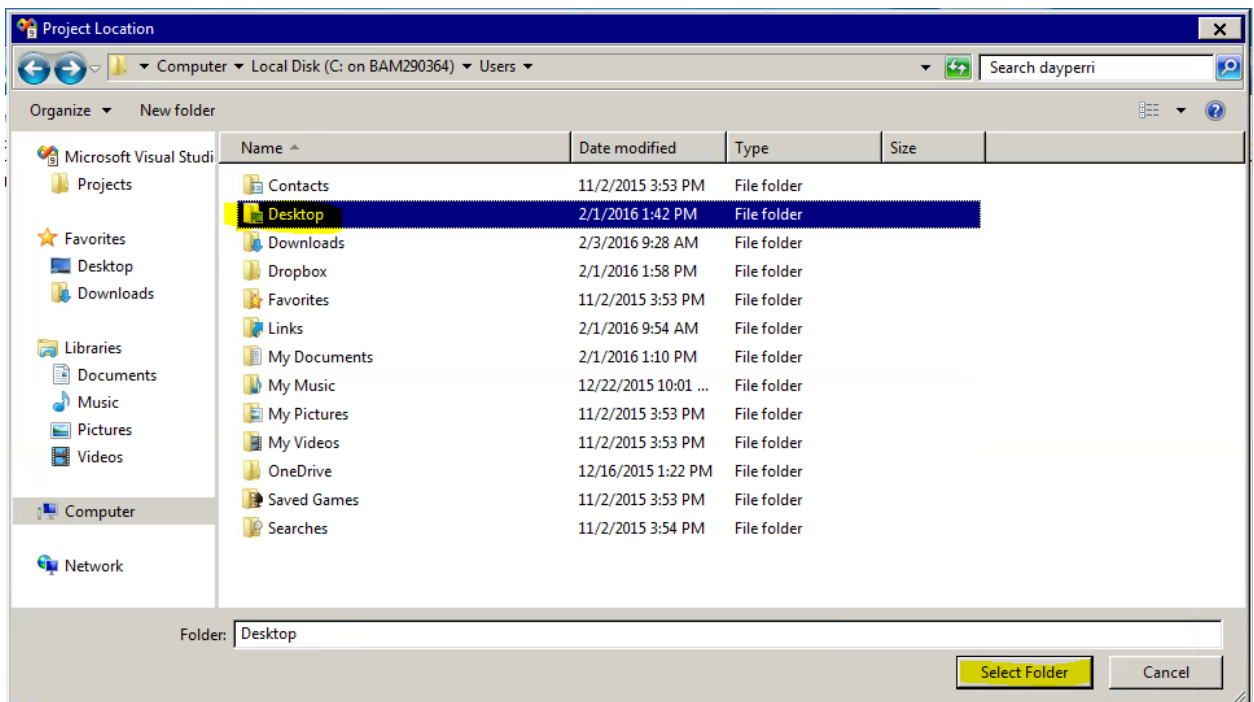

6. Double-click the **Users** folder.

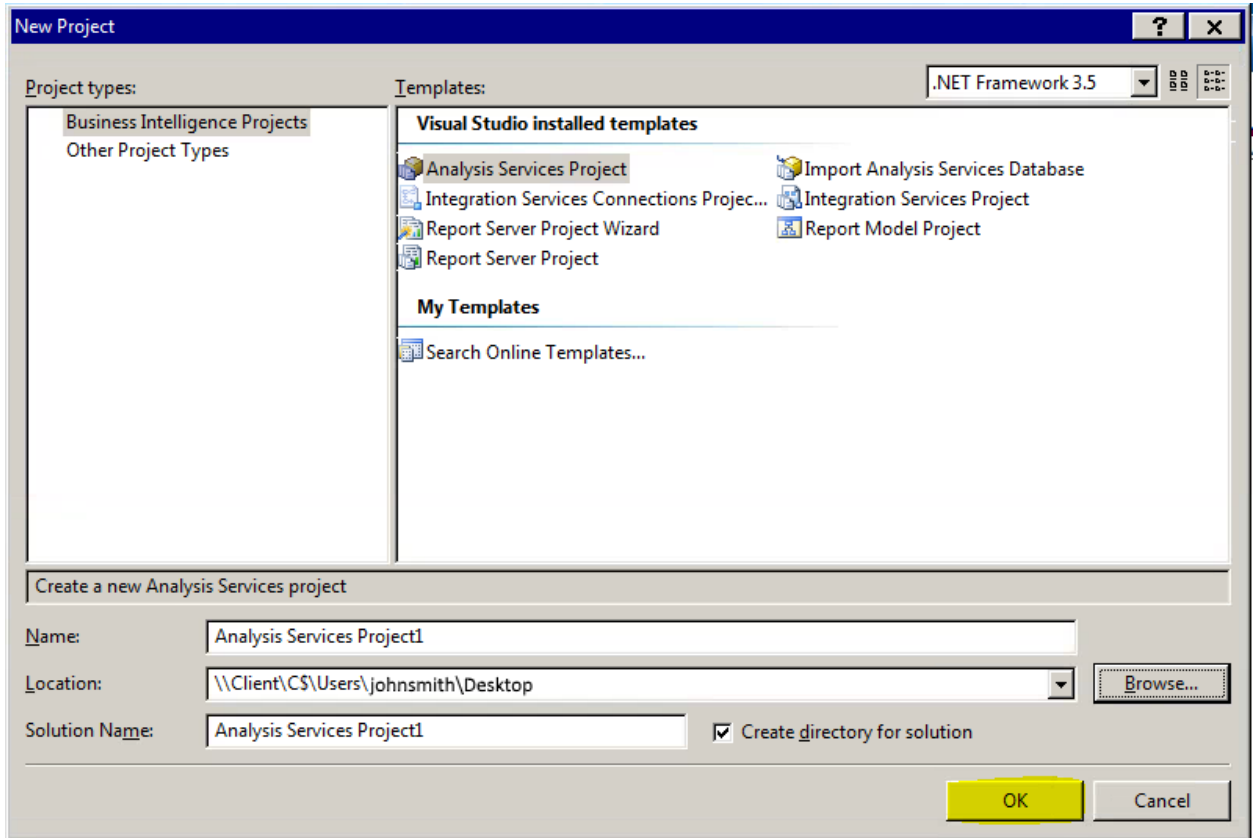

7. You should see a folder with ***your computer name or your first and/or last name***. Double-click ***your folder name*** to view your folders.

8. Click the folder you wish to create the project in. In this case we are selecting **Desktop**. Then click **Select Folder**.

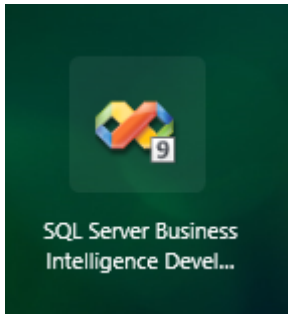

9. Click **OK** to create your project.

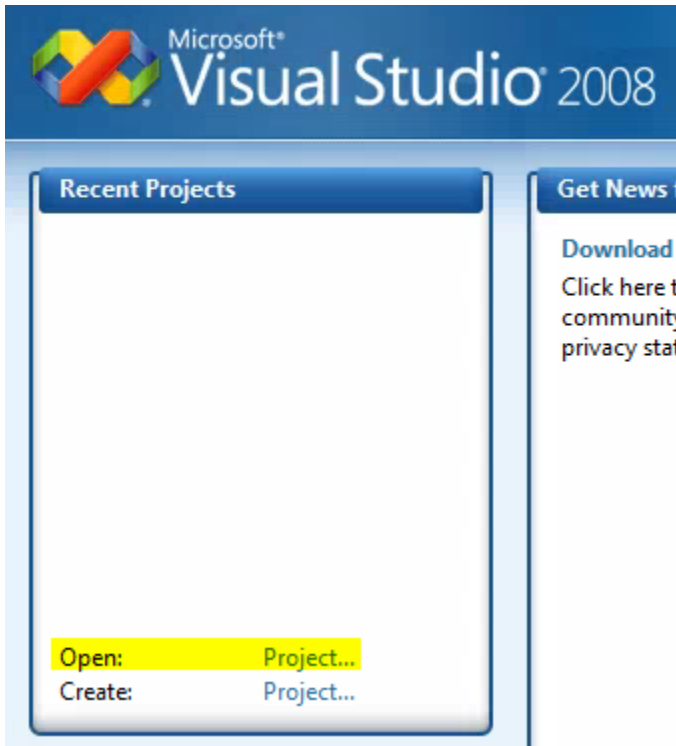

How to Open a Project in Visual Studio

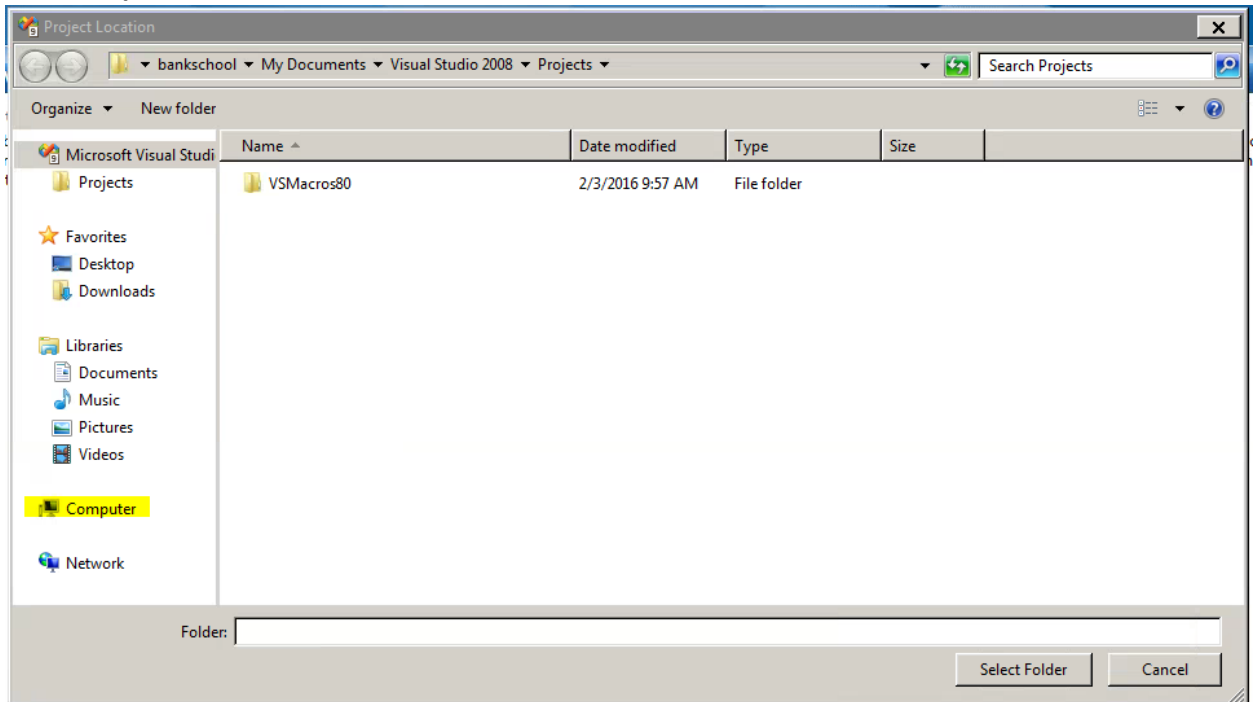

1. In Citrix Receiver open **SQL Server Business Intelligence Developer**.

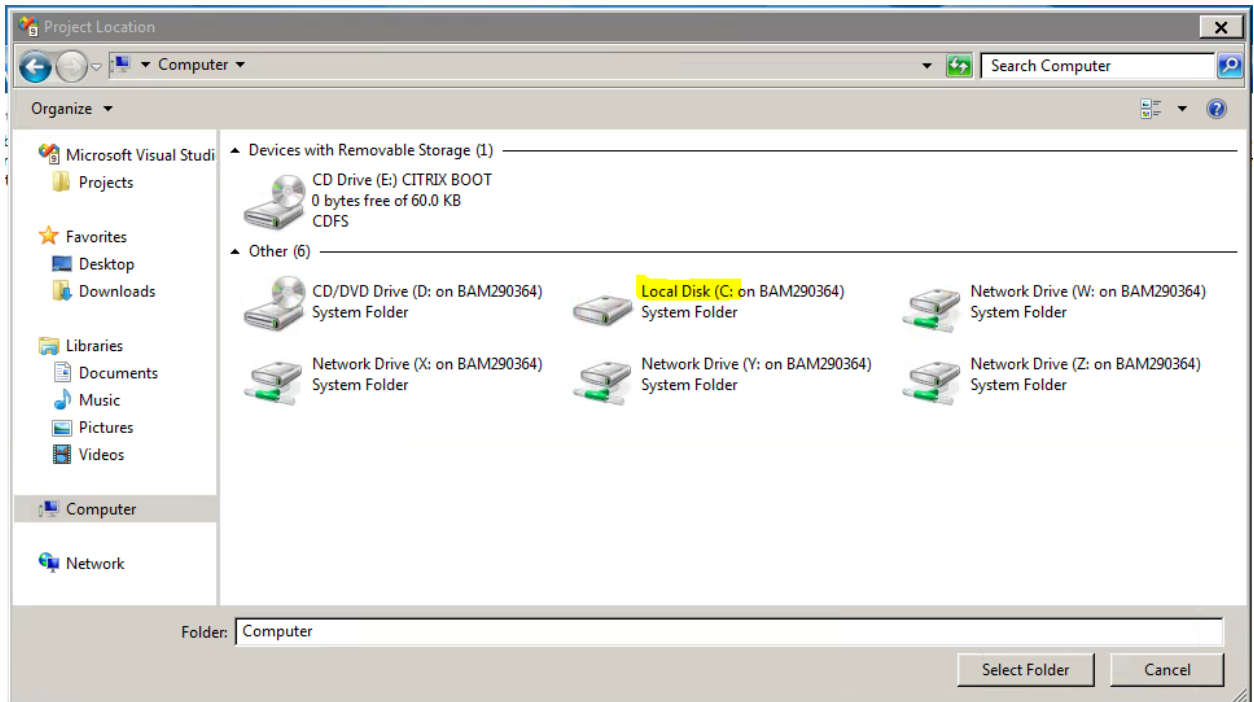

2. Click **Project** next to "Open:".

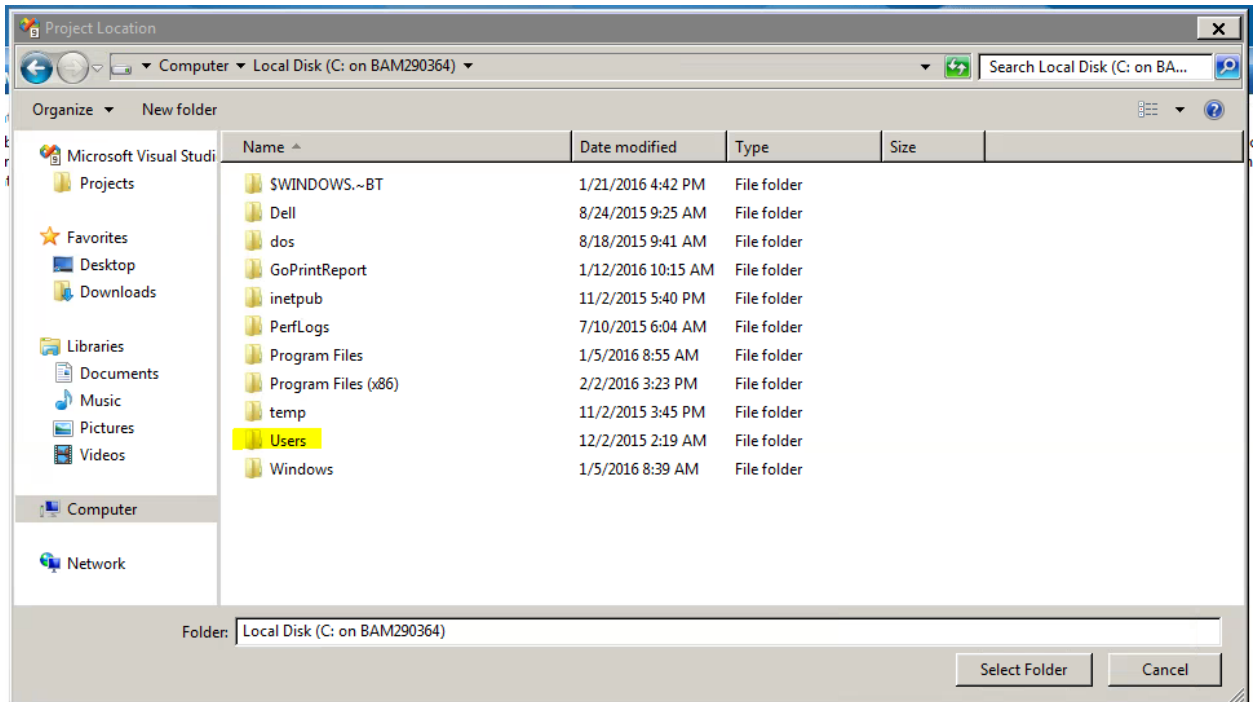

3. Click **Computer** on the left menu.

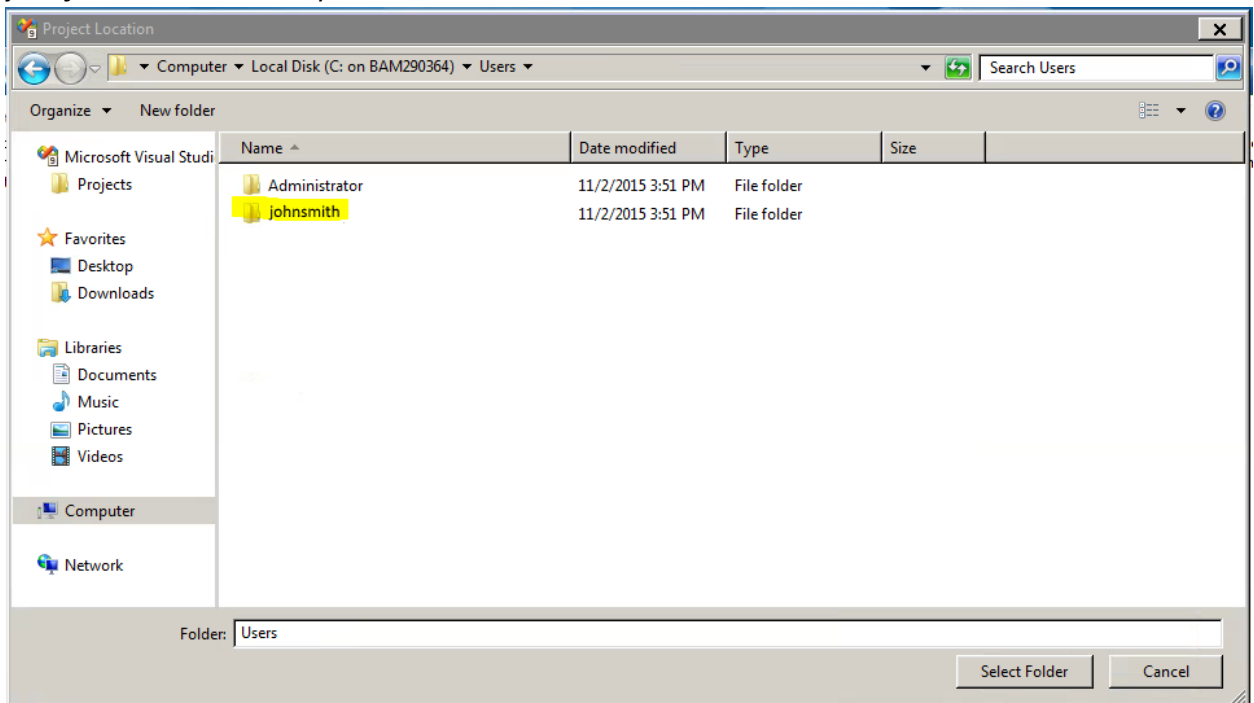

4. Double-click **Local Disk C:**

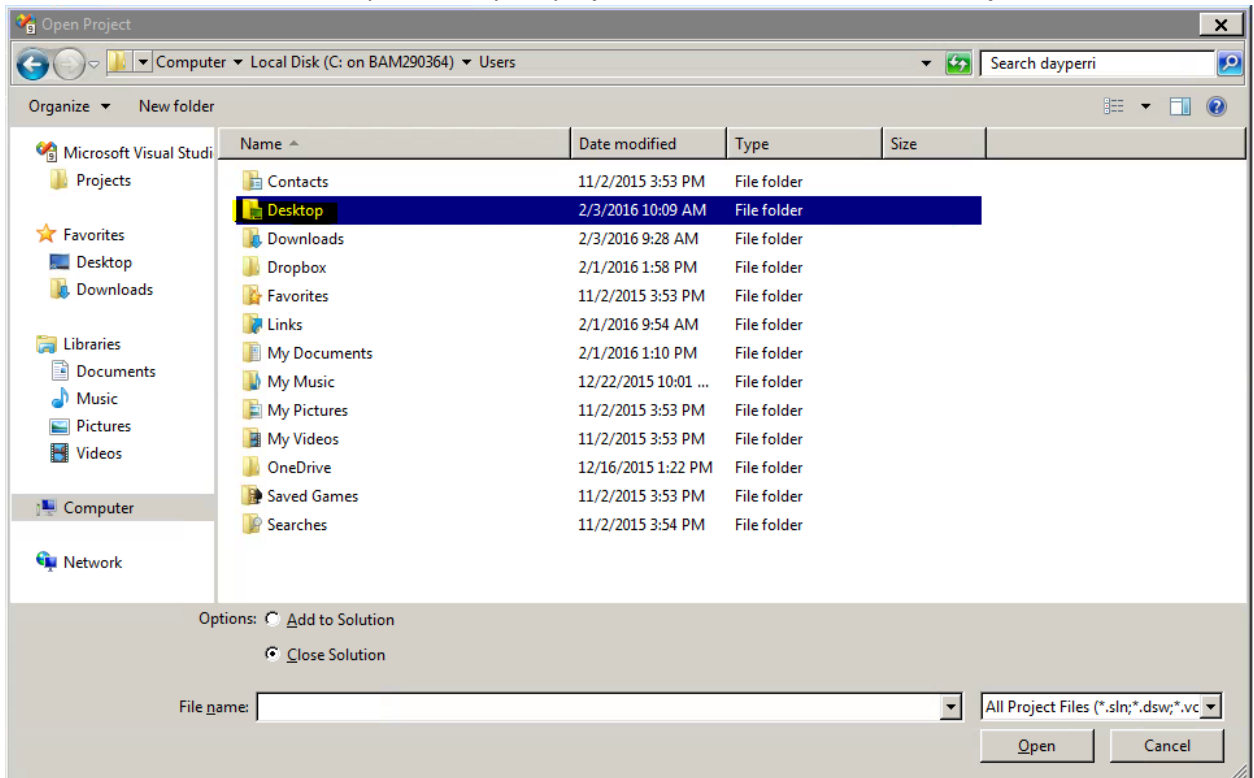

5. Double-click the **Users** folder.

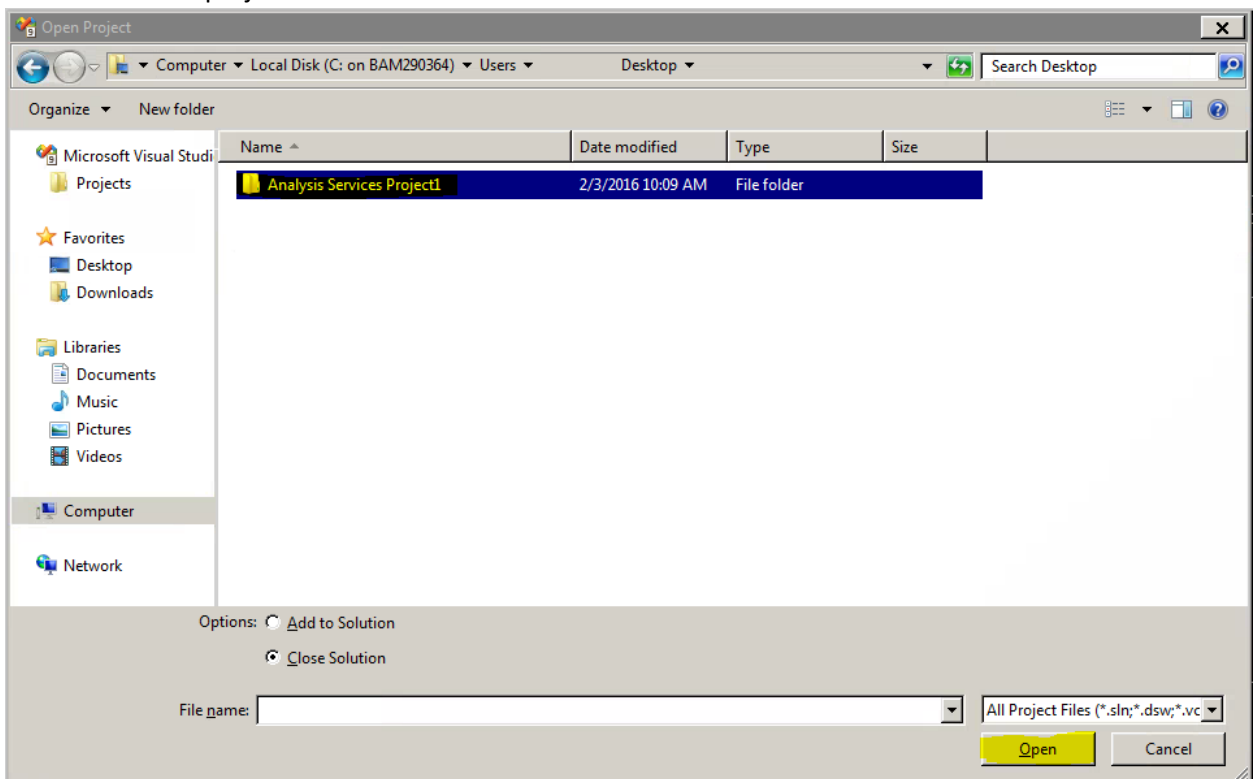

6. You should see a folder with **your computer name or your first and/or last name**. Double-click **your folder name** to view your folders.

7. Double-click the folder where you saved your project. In this case we used **Desktop**.

8. Double-click the project folder.
