

How to open a file in SQL Server on Citrix

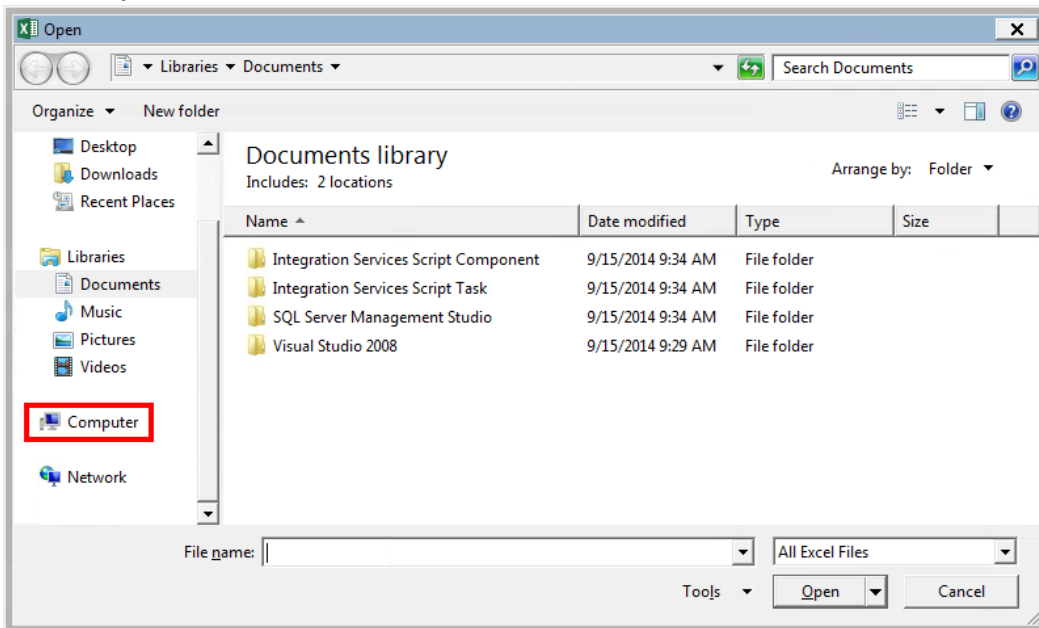

1. Open Citrix Receiver and launch SQL Server Management Studio.

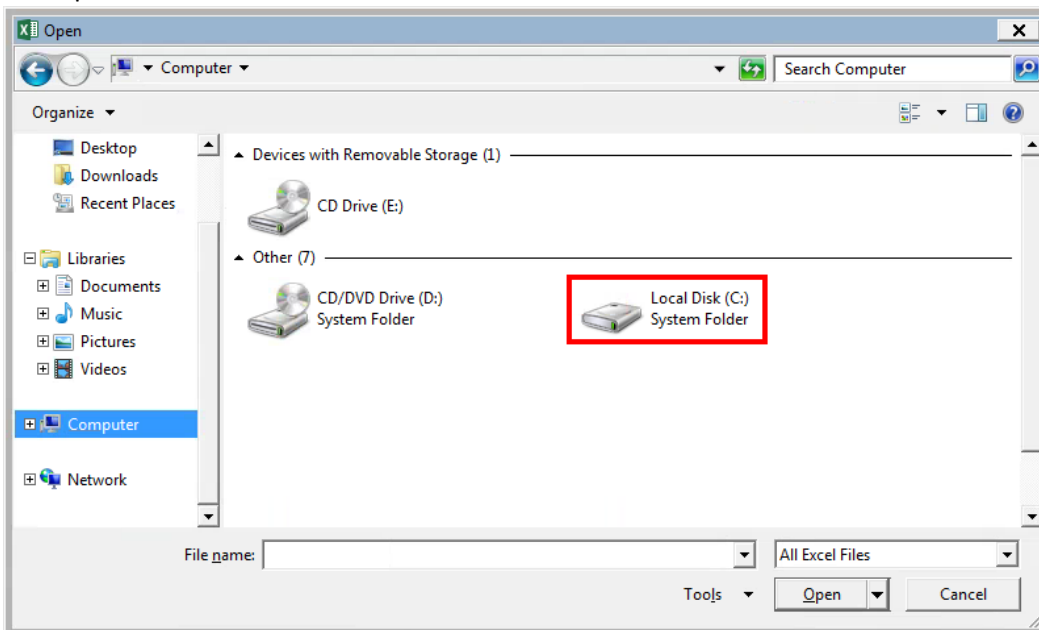

2. Click **Open** -> **File**.

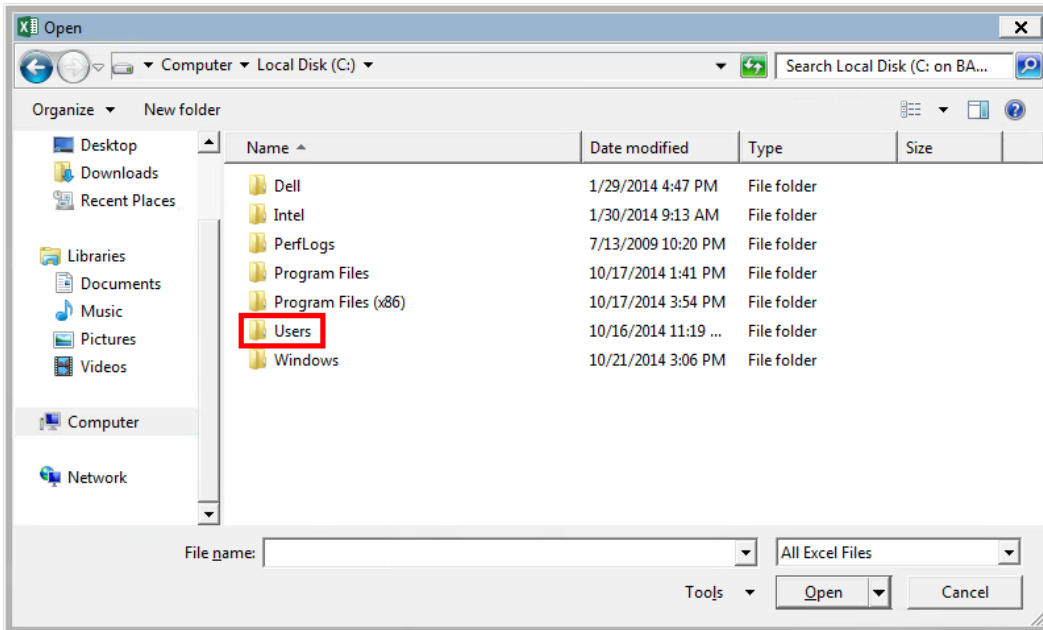

3. Click **Computer** on the left menu.

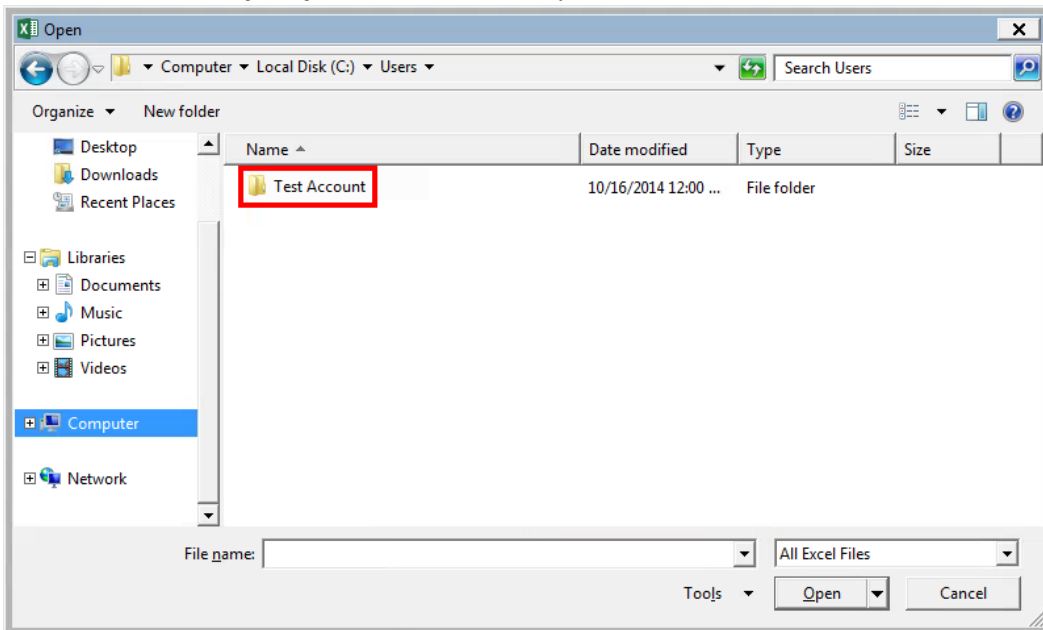

4. You should see a **Local Disk (C:)** drive. This is the drive of your personal computer. Double-click it to open it.

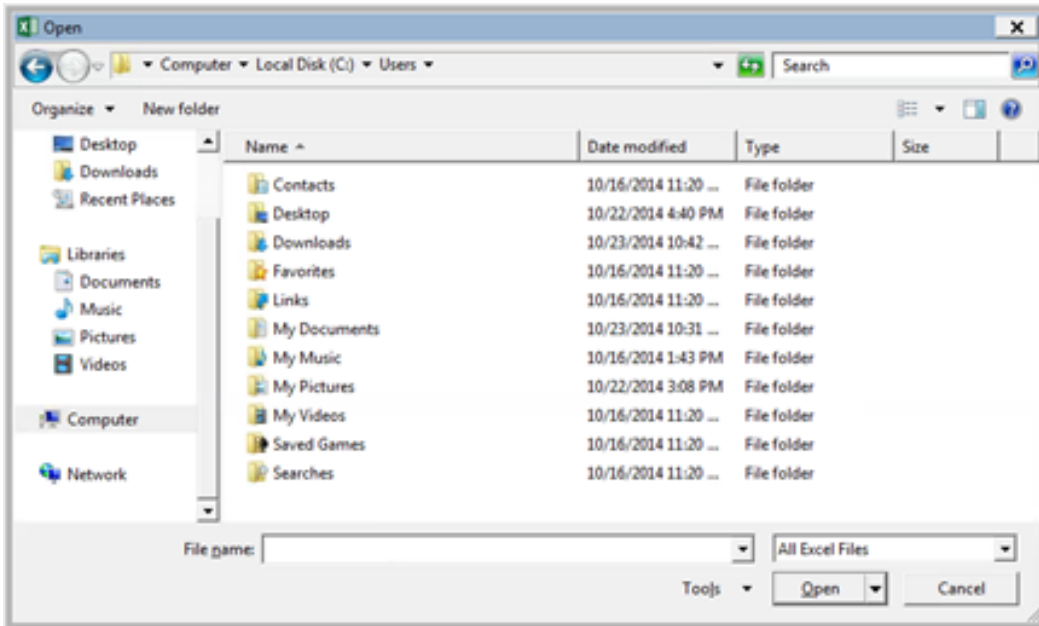

5. Open the **Users** folder.

6. In the "Users" folder you should see a folder with ***your computer name or your first and/or last name***. Double-click ***your folder name*** to view your folders.

7. You should now see all your folders on your personal computer.

8. Open the folder you have saved your file in. Then select the file and click **Open**.
